

## **(MCSR&R)**

### **MCS Referral and Resources**

**There has been a long-standing misunderstanding that I once acted as "cofounder", "Medical Director", and "President" of an organization called MCS Referral and Resources**, named by its founder, Albert Donnay. At the time of its founding, Mr. Donnay chose the organizational name, determined the organizational practices and policies, and chose to file papers that listed me in the above roles.

However, at no time was I given the **authority** by Mr. Donnay even remotely resembling those suggested by the above titles.

### **How MCSR&R Worked**

Medical projects and policies were initiated by Albert Donnay, not by me. The medical role I was allowed by Mr. Donnay was to proofread materials with medical content.

### **Summary**

There were and are significant medical and other differences between me and MCSR&R. None of their policies, practices or recommendations should be considered to be mine. I was not nor am I in a policy role vs MCSR&R.
